Re: **067-15518**
First Administrative Amendment to
FESOP 067-13960-00054

Dear Mr. Thomas:

Mohr Construction Company, Inc. was issued a permit on November 21, 2001 for an existing asphalt pavement production plant. A letter requesting the replacement of a dryer/mixer burner was received on April 17, 2002. Pursuant to the provisions of 326 IAC 2-8-10 the permit is hereby administratively amended as follows:

The proposed burner will result in an increase in the maximum production rate (from 350 to 400 tons per hour) and burner capacity (from 96.5 MMBtu/hr to 100 MBtu/hr).

However, the general FESOP establishes limits that will maintain the source PTE at the pre-modification levels.

Since there will be no change in the source PTE limited under the General FESOP, no new applicable requirements triggered, and no changes to the existing requirements, the proposed burner shall be incorporated into the permit via an administrative amendment pursuant to 326 IAC 2-8-10(a)(6) which states that revisions that consist of descriptive information where the revision will not trigger any new applicable requirements or result in a violation of a permit term, may be incorporated into the permit via an administrative amendment.

The only change to the permit that shall be made as a result of the proposed modification is changing the current production rate listed in Condition A.1 from 350 tons/hr to 400 tons/hr.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates an asphalt pavement production plant.
